Prospective investors should consult with their professional and financial advisors before making an application for Shares.

**Depository:** Citi Depository Services Ireland Designated Activity Company.

The NAV per share is calculated in US Dollars and settlement and dealing will be effected in the class currency of the relevant share class. The NAV per share of the Sub-Fund will be published daily and made available on [www.bloomberg.com](http://www.bloomberg.com) and will be updated following each calculation of the NAV.

The assets of this Sub-Fund are segregated from other Sub-Funds in the Fund, meaning the liabilities of one Sub-Fund cannot impact another Sub-Fund.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Summary Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.**

The risk indicator assumes you keep the product for a minimum of 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may have to pay significant extra costs to cash in early.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## WHAT HAPPENS IF WAYSTONE MANAGEMENT COMPANY (IE) LIMITED IS UNABLE TO PAY OUT?

You may lose some or all of your investment due to the default of the Sub-Fund and/or the Fund. The Fund is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return. There is no investor compensation scheme available to investors in the Sub-Fund. An investment should only be made by those who can sustain a loss on their investment.

The Manager of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

## WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- SGD 10 000 is invested.

<b>Total Costs</b>	750 SGD	<b>2124 SGD</b>
