What is this product?

Type

This is an open-ended investment company with variable capital, incorporated in Ireland.

Objectives

Investment objective The investment objective of the Sub-Fund is to achieve medium to long-term growth through investment primarily in growth oriented Indian stocks which are listed on the BSE and NSE exchanges in India.

Investment policies The Sub-Fund intends to achieve its investment objective by investing on a permanent basis more than 75% of its Net Asset Value in a diversified portfolio of equities and equity related securities of (i) large, mid and small-cap corporations that have their registered office in India and are listed on Recognised Exchanges worldwide, (ii) large, mid and small-cap corporations that exercise a preponderant part of their economic activity in India and are listed on Recognised Exchanges worldwide and/or (iii) large, mid and small-cap corporations whose equity and equity related securities are listed, traded or dealt in on Indian stock exchanges. The investment in securities which are listed on Recognised Exchanges other than BSE and NSE will not exceed 25% of the Net Asset Value of the Sub-Fund.

The Sub-Fund invests approximately 60-80% investment in large cap companies and approximately 20-40% investment in mid and small cap companies.

The Sub-Fund will follow a bottom-up approach to stock picking and will build its portfolio around companies which are most attractive at any point in time both in qualitative /business factors as well as financial factors. These factors are essential in determining the mix of the portfolio between large/mid cap/small cap companies.

In relation to the equity related securities in which the Sub-Fund may invest, these may include, but are not limited to, preference shares, convertible bonds, convertible preference shares and American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") of Indian companies which are listed on a Recognised Exchange for the purpose of gaining indirect exposure to equity securities where the Investment Manager feels it is more efficient to do so.
The convertible bonds are unleveraged instruments and do not embed derivatives.

The total exposure in equity related securities will not exceed 25% of the Net Asset Value of the Sub-Fund.

The Sub-Fund will continuously invest more than 50% of its Net Asset Value in equities of corporations listed on the BSE and NSE.

The Sub-Fund has no restrictions as to the proportion of assets allocated to companies in any particular economic sector.

The Sub-Fund may also retain up to 10% in cash, cash equivalents and money market instruments (including, but not limited to, cash deposits, commercial paper and certificates of deposit) in the appropriate circumstances.

The Sub-Fund is considered to be actively managed in reference to the MSCI India Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes only. The Benchmark is not used to define the portfolio composition of the Sub-Fund and is not used as a performance target. The Sub-Fund may invest in securities which are not constituents of the Benchmark.

The Sub-Fund falls within the scope of Article 8 under the SFDR, i.e. a fund that promotes environmental and/or social characteristics.

The Sub-Fund will have a minimum proportion of 10% of its investments in sustainable investments.

Benchmark The Sub-Fund is considered to be actively managed in reference to the MSCI India Index by virtue of the fact that it uses the Benchmark for performance comparison purposes only.

Redemption and Dealing Investors can purchase and sell the shares on any day on which banks and stock exchanges in India, and banks in Ireland and Singapore are generally open for business.

Distribution Policy Income generated is distributed.

Fund Currency The reference currency of the Sub-Fund is USD and the currency of the share class is USD.

Launch date The Fund was launched on 15/07/2015. The share class was launched on 10/10/2019.

Conversion of shares Shareholders will be able to apply to exchange all or part of their holding of shares of any class in any sub-fund for shares in another class. For more detailed explanation, please refer to the Prospectus.

Asset Segregation The assets and the liabilities of each Sub-Fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Other information about the Fund, as well as the Net Asset Value (NAV) per share of each class, as well as the Subscription Price and Redemption Price, may be obtained on any day which is open for business, at the registered office of the Fund.

What are the risks and what could I get in return?

Risk Indicator

Lower risk						**Higher risk**
1	2	3	**4**	5	6	7

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.waystone.com/.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 30 September 2024 and 31 October 2025.

Moderate: this type of scenario occurred for an investment between 31 December 2019 and 31 December 2024.

Favourable: this type of scenario occurred for an investment between 30 December 2016 and 31 December 2021.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	**610 USD**	**1,219 USD**
Annual cost impact*	**6.1%**	**2.4% each year**

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.5% before costs and 10.1% after costs.
